CATALOG

Our list of choice plants in the following pages includes some of the most valuable plants in the world for breeding purposes, as well as for exhibition and for just plain enjoying purposes. From these names you can see why our seedlings are achieving such success in the orchid world. Many of these seedlings which have flowered once or twice are clearly superior to varieties which received their awards a number of years ago.

Our seedlings are sturdy and large for their pot sizes ---- we feel certain you will be pleasantly surprised.

Some of the varieties are limited, so we suggest that you order early. Reservations will be made if necessary and you will be notified when they are ready.

Plants will be shipped via Railway Express collect, out of pots, unless otherwise specified.

Cattleya Seedlings

CARE OF ORCHIDS IN THE HOME

Location - Place the orchid plant near a window or under a tree, giving it as much light as possible. Do not let the sun shine on the plant except early morning or late afternoon.

Watering - Pot water the plant heavily by filling the pot completely once a week. During the hot summer months give a light spray over the leaves daily. During the cool winter months apply a light spray over the leaves about twice a week.

Temperature - Cattleya plants like "comfortable living" home temperatures. 70°.

Humidity - If plants are grown indoors where there may be heat, the pot can be placed in a tray containing gravel or small pebbles. Keep some water in the tray with the water level being constantly below the bottom of the pot.

Repotting - Plants should be repotted on an average of every two years, or when the plant starts growing outside the pot. We will repot your orchid for a slight nominal fee when needed.

Fertilizing - We recommend fertilizing vandas, phalaenopsis and all botanicals once a week, alternating with an organic fertilizer one week and a chemical fertilizer the next week. Cattleyas should be fertilized at least once a month. We recommend using 30-10-10 for plants potted in bark. Plants potted in osmunda or Mexican tree fern can be fertilized with any all-purpose plant food.

VANDAS

<u>Seedlings in 3" pots</u>		<u>Price</u>
207	V. Burgeffii x V. Afterglow	3.50
209	V. Afterglow x V. Mary Foster	3.50

	Vanda terete Miss Joaquim	.50
	Vanda terete Agnes Joaquim, Atherton's var.	.50

GROWING SUPPLIES

We have the sole distributorship here in South Florida for Silvabark. This bark comes in three different grades - fine, medium and coarse, and is by far the most outstanding media we have ever used. We are using this bark exclusively for all of our growing. A two-cubic foot bag retails for \$4.50. We also sell trial bags at \$1.00. Ton-lot prices will be given upon request.

We also handle all growing supplies and fertilizers for the growing of orchids, and are distributors of Mexican tree fern in two-cubic foot boxes in fine and coarse grades, also in chunks and logs.

BOTANICALS

	<u>Price</u>
Aerides Odoratum, lavender, fragrant	10.00
Brassavola Digbyana Fimbriapetala, very fringed	5.00
C. Citrina	5.00

Non-Warranty-- Because growing conditions and cultural methods are not the same in every locality, we -- R. H. GORE ORCHIDS -- give no warranty express or implied, as to the productiveness of any of the plants we sell and will not be in any way responsible for the crop. Our liability is limited to the purchase price of plants. All prices listed in our catalog are FOB, Fort Lauderdale, Florida.
